

Health Occupancy Management Solutions (HOMS)

www.asgardgroupllc.com

We protect the workplace and the public from the spread of COVID-19, and airborne infections. HOMS is a collection of FDA approved products and service innovations designed to support the COVID-19 response. HOMS offers low cost scalable solutions for diagnosis, case management, and risk communication. We deliver custom solutions for every situation. **Contact us, we will work with your team to design a custom HOMS solution to address your needs.**

Temperature Monitoring Solutions

Protective Shields

Contact Tracing/Social Distancing Solutions

Sterilized Sanitizing Solutions

Reception and Direction-Finding Solutions

Touchless Solutions

Temperature Monitoring Solutions

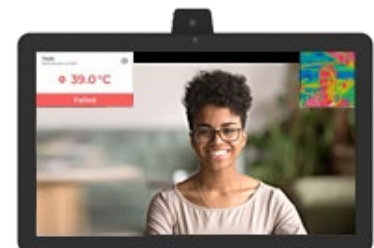

Monitoring Solutions using the following various products:
Thermal Kiosks, Imaging Carts, Sanitizing Stand, Tablet Floor Stand

- Comprehensive solutions that combine AI with human-based monitoring temperature detection
- AI-powered interface decreases false positives and delivers a more accurate reading
- Scans up to 3 people per second, with facial recognition
- Strong facial recognition performance; maximum 50000 face database
- Full face, skin temperature detection; works with hat, glasses & mask
- Three base options; upright, wall-mounted, or desktop

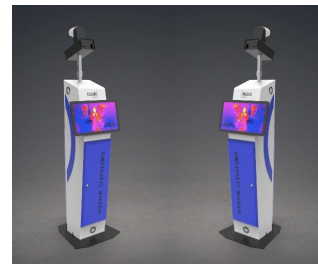

Temperature Check Tablet

- Easy-to-implement tablet solution scans people entering a location and will alert on temperature within 1 second from 3.3 feet away
- Hygienic no-touch solution to provide first layer of screening protection; available in 3 sizes to meet every organization's need

Thermal Checkpoint

- Includes a 4K digital, ONVIF compliant camera that streams video
- Provides a visible image in full color and allows simple identification of subjects who may need additional screening

No-Contact Digital Thermometer

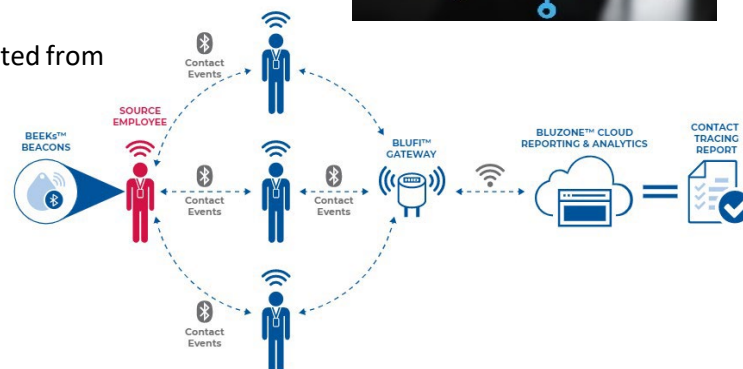

- Accurate & Reliable – Medical Class II FDA certification ensures a high accuracy rating and reliability
- Easy Reading - 3 colors backlight LCD for easy reading. Green backlight for normal temperature, Yellow backlight for slight fever and Red backlight for high fever

Contact Tracing/Social Distancing Solutions

Contact Tracing

- This service delivers location-aware data to address people under a single IoT umbrella
- Digital Badge holder stores the unique identifier, timestamp, and the approximate distance with human interactions
- Contact tracing within the workplace analyzes the data collected from social distancing monitoring solution
- ID Location Services is the location engine, powered by a Bluetooth to Wi-Fi network

Social Distancing Monitoring

- Social distancing monitoring solution that uses your existing security access badge
- Delivers an IoT Enterprise Enablement Platform
- Visitor Counting Analytics Count total people passing through a particular location

Reception & Direction-Finding Solutions

Amplify Virtual Receptionist

Enhance your virtual assistant's facial and voice recognition capabilities for paramount user experience by attaching:

- HD Cameras
- Speakers/ Mics

Landscape and Wall Kiosks

- Indoor kiosk to show up-to-date information and directions
- Provide continuous updates beyond the entrance, throughout hallways
- With a profile less than 1" thin this in-wall kiosk creates a minimalistic look to a large format digital wall signage

LED A-Series Posters

- All-in-one design – Fast and easy setup with built-in media player
- Ultimate Versatility – Multiple setup options with included floor stand, hanging mount, as well as ability to cascade multiple displays together
- Lightweight and thin – 65lbs/ 35mm for easy transportation and setup

Protective Shields

Guardiant Plexiglass

- Plexiglass 'sneeze guard' built to help reduce the spread of contagious airborne germs
- Ideal for grocery, convenience, and retail settings
- Aluminum frame and plexiglass construction; made in the USA

POSShield Portable Plexiglass

- Portable plexiglass 'sneeze guard' for retail and POS applications
- Sturdy base plate requires no drilling or mounting
- Durable steel and plexiglass construction

Free Standing Shield

- Lightweight, freestanding solution to help maintain a physical barrier during person to person interaction
- Constructed of stronger than glass polycarbonate; 12" wide x 3.5" tall cut out serves as a pass-through window

Sterilized Sanitizing Solutions

UV Sanitation

- UVC light is a quick and easy way to kill harmful bacteria and germs
- Solutions for UV light sanitation, including lights that mount onto high touch Point of Sale Payment devices

UV Sterilizer Box

- Phone sanitizer that kills 99% of the most common surface bacteria (can be used for keys, sunglasses etc. as well)
- Short Cycle Time: One full sanitization cycle will take 6 minutes

Portable UV-C Sanitizer

- High Intensity Cordless UVC Cleaner – Kills 99.9% of Bacteria!
- Can be used to clean anywhere and anything in a classroom, home or office, even large toys, keyboards, instrument panels, touchscreens, etc.

UVC Wand Sterilizer

- UVClean Wand Sterilizer sanitizing device uses ultraviolet light for disinfecting surfaces (including shoes, laptops/tablets/keyboards, cellphones, baby toys, gym lockers, doorknobs, toilet covers, countertops, face masks, and other PPEs)
- Effective on plastics, wood, metals, fabric, and other materials

UVClean Tabletop Sterilizer

- Sanitizing appliances 360° use test-proven 254nm ultraviolet light to disinfect the surfaces of objects without chemicals and laborious scrubbing
- Safeguard spaces up to 1614sqft in homes, offices, schools, churches, restaurants, gyms, clinics, hospitals, government, and public buildings

Personal Protective Solutions, Masks, Gowns, and Gloves

- A particulate-filtering facepiece respirator meeting the U.S. National Institute for Occupational Safety and Health (NIOSH)
- Protective masks designed to prevent infections by catching bacteria

Touchless Solutions

Touch Screen Sharing and Controls

- Avoid high-touch surfaces; Control a touch screen's display on your mobile phone
- High-resolution mirroring; 4k-4k mirroring, 4-to-1 projection: 1080p
- Cross-platform enabled; User Managed

Touchless Biometrics (Social Distancing Monitoring)

- Employs biometrics for physical and logical access control, without requiring personnel to touch potentially contaminated reader surfaces
